

Sodium Bicarbonate: Residual Solvents Statement

Genesis affirms that our Sodium Bicarbonate (all grades) complies with the current USP/NF General Chapter <467> residual solvents guidelines. Class 1, Class 2, or Class 3 solvents listed in the International Committee of Harmonization (ICH) are not a part of our manufacturing process.

Genesis Alkali has a representative set of sodium bicarbonate samples analyzed to the current USP/NF general chapter <467> residual solvents guidelines. No solvents have been detected in our sodium bicarbonate samples above the specification limits since the inception of testing.

Read the product Safety Data Sheet (SDS) prior to using the chemical.
